

SAPORITI MACHINES FOR BARRELS AND TWIN SCREWS BARRELS

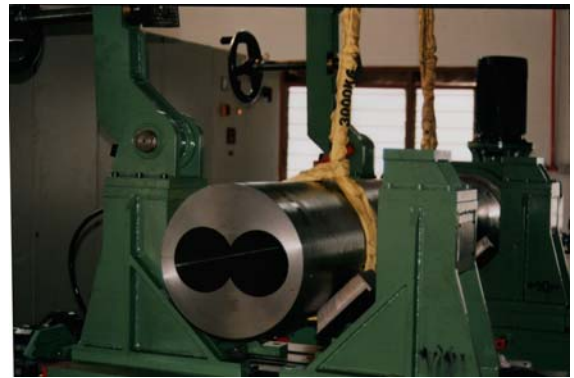

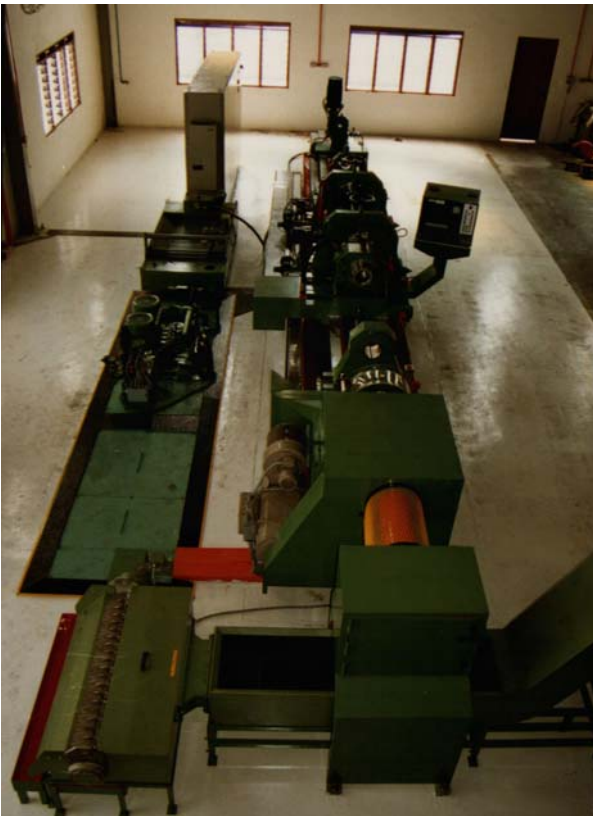

SAPORITI are specialized in the construction of drilling, boring and lapping machines for deep holes.

Our drilling machines can be equipped with the option to allow the honing of the cylinders on the same setup.

SAPORITI drilling machines use high quality roller guides to ensure the best performance, high accuracy and excellent finishes constant over time.

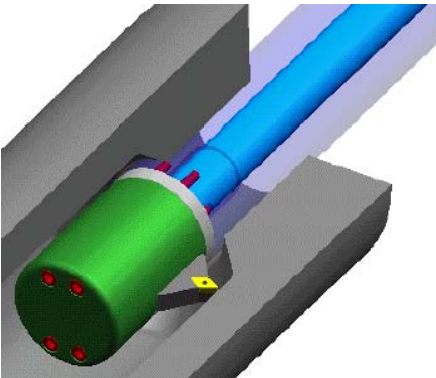

They are equipped with CNC Siemens of latest generation.

"SAPORITI FL" models have a fixed workpiece and are very suitable for the manufacturing of single or twin-screw non-symmetrical pieces.
